

# Easy Device Deployment

## Easy Deployment Server

ALE's Easy Deployment Server (EDS) offers our business partners and end user customers cloud based, efficient and easy-to-use device redirection services.

The EDS allows zero touch configuration of ALE SIP devices for the end user. Upon initial boot-up, registered ALE SIP devices will automatically collect its configuration file without any specific configuration for the end user on the phone or network infrastructure level.

### "Zero-Touch", Massive Deployment

ID	MAC	Profile Name	Company Name	Update time	Operation
1	02:21:23:12:10:48	100	Green field	2020-07-08 07:21:10	OK
2	78:60:15:04:23:02	VODIA	ALCOT	2020-06-24 12:14:10	OK
3	48:7A:15:05:20:02	100000	100000	2020-06-25 09:10:10	OK
4	48:7A:15:05:20:02	100	ALCOT	2020-06-25 09:10:10	OK
5	78:60:15:04:23:02	VODIA	VODIA	2020-06-25 09:10:10	OK
6	78:60:15:04:23:02	100000	100000	2020-06-25 09:10:10	OK
Total 6					OK

Device Overview	Server Overview	Certificate Overview	Profile Overview
38 Total	34 Total	13 Total	24 Total

## Benefits

### VADs & Service Providers

- Global access, remote configuration
- No additional network layer settings
- Secure solution with HTTPS & certificates
- Reducing deployment time and cost

### End User Customers

- Auto redirection, saving development cost
- No additional customer action
- Realizes "plug-and-play"
