Alcatel-Lucent Enterprise AT10/AT10 ANC True Wireless Earbuds

AT10/AT10 ANC True Wireless Earbuds

New-generation headset for hybrid work in different scenarios

DESIGNED FOR LIFE
ENJOY @ WORK

Immersive Audio

The unique ALE Acoustic Guard combined with a multi-microphone array provides clear voice transmission and blocks out background noise for effective communication. Say goodbye to distractions with active noise-cancelling technology, enabling you to work with laser-like focus. Transparency mode allows you to hear the world around without taking off your headset.

Flexible Connectivity

Connect to both your phone and computer, seamlessly switch between devices, and enjoy an excellent experience. Compatible with mainstream unified communication platforms. Boost your productivity in phone calls and video conferencing, whether you are in an open office, work from home or anywhere.

Robust Performance

The long Bluetooth connection range of 40 meters allows you the freedom of pacing away from the desk while on the phone. Provides you with 6 hours of listening experience, and the portable charging case provides an additional 18 hours of battery life.

Ease of Use

Multiple modes are easily accessible via gentle taps. Mute mode allows you to stay connected to your surroundings during a call without worrying about sound leaking into the other party's earbuds. Choose from three sets of silicone earbuds to ensure a comfortable fit that caters to different ear shapes.
